Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Cook 3,295,471. Cook teaches a mounting frame of metal wire rod made up of sides bars 11,12,14,67,42 adapted to be fastened to a wall via elements 17,38. The mounting frame having a retaining block 74 and 59 respectively in the shape of a ball. Bearing frames 71 and 63 are pivotally attached to the frame. To employ more than one retaining block for the purpose of a more secure hold would have been obvious for one having ordinary skill in the art at the time of the invention. Whether the retaining blocks are at the top of the frame or on the two sides of the frame would have been obvious for one having ordinary skill in the art and is considered to have been a matter of choice in design.

Applicant asserts several alleged advantages of the present device over the Cook device but fails to point out why the Cook device does not read on all aspects of the device except for two retainer blocks instead of one. Applicant argues that two retainer blocks would not have been obvious over the one shown in the reference. The examiner disagrees and still asserts that providing two retaining block for the purpose of providing a more secure hold would have been obvious for one having ordinary skill in the art. Likewise, the positioning of the two retaining blocks at either end of the bar

upon which it is supported would have surely been a matter of choice in design obvious for one having ordinary skill in the art at the time of the invention.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
